

TESTIMONIAL - Evan Sorokin, MD: “Patients love MIRAPeel, and happy patients equal success!”

We’ve been using MIRAPeel and the excellent MIRAProducts since about two and a half years with great success in my Cherry Hill, NJ, and Philadelphia, PA offices in our practice with our patients.

During this period of time, we treated over 1000 patients and thousands of skin procedures using our 2 MIRAPeel devices. Our MIRAPeel treatment protocols are diverse, including both face and body procedures.

MIRAPeel is an impressive system of microneedling and micropeeling which offers quality and results. Unlike many pen type microneedling systems that seem to tear and rip at the skin, this wet microneedling concept is controlled and safe. It brightens the skin, improving clarity and tone. It helps to improve texture while hydrating and nourishing the skin.

We are proud to offer personalized results achieved through the use of the best technologies in an environment of trust and respect for each patient’s objectives. As we strive to create consistent, natural, and lasting results for our patients, we found that MIRAPeel consistently delivers, its outcomes are very positive.

Support from eMIRA has been top-notch and almost as impressive as the machine. We thank Serge himself too, eMIRAMED founder and the creator of the MIRAPeel technology for the innovations and continuous support.

Our Patients love MIRAPeel, and happy patients equal success!

Evan Sorokin, MD
